Summary of key responses to CP Scoping Questionnaire

Q1	Q2	Q3	Q4	Q5
Do you have any comments on the timetable for producing the Cheltenham Plan?	Do you have any comments on the current Corporate Vision and JCS Vision and how they should relate to the Cheltenham Plan?	Please tell us your Vision for Cheltenham	What do you think about the idea of a themed Vision?	Name one thing in Cheltenham that you like
Significant number of "no comment" responses. In broad terms an equal split in other responses between those urging plan preparation to proceed more rapidly and those raising concern about the timetable and the plan apparently rushing ahead of the JCS. In essence: some people think we're going too fast, others think we're going too slow.	Some support for extant corporate vision, some criticism of emerging JCS vision. Salient points include: - Infrastructure improvements should be included (transport, community facilities); - provision of sufficient housing should be included, together with enhanced tourism offer and re-use of previously developed land; - tendency for existing visions to relate to "anytown" needs to be addressed – more specificity for the town needed; - vision could be bolder.	General categories (in order of frequency of citation): - a place with better public transport provision (road & rail); - achievement of balance between a range of potentially conflicting concerns such as growth versus conservation of valued assets; - maintenance of the town's vibrancy and attractiveness; - encouragement of sustainability and protection of green assets; - other infrastructure improvements (affordable housing, crime prevention); - ensuring the vision is distinctively about Cheltenham.	Generally this proposal is strongly supported, particularly as a way of making the vision more specific to Cheltenham. A few respondents disagree, while the support of others is tempered with concern that there must be a good relationship between the themes to avoid loss of depth and obscuring of more detailed or nuanced issues.	The quality of Cheltenham's built environment — including its open spaces, parks and trees — is highly prized by many, as is the town's broader landscape setting. Culture and the various festivals cited by several respondents, as is the town's vitality.

new development/growth; - poorly linked retail centres. Specific areas cited include Pitville Campus Tower Block and the High Street. Iand, economic vitality and sustainable transport has the highest number of "very important" responses. Safeguarding existing employment land and provision for the elderly/disabled has the highest number of "quite important" responses. The highest number of "according to the plan; - brownfield redevelopment; - affordable housing and housing generally; - conservation of the built and natural environment; - preservation of agricultural land; - brownfield redevelopment; - affordable housing and housing generally; - conservation of the built and natural environment; - preservation of agricultural land; - brownfield redevelopment; - affordable housing and housing generally; - conservation of the built allowing these local distinctions to be compromised or - the link between the nature of the town and its peripheral villages. Some of the town and its peripheral villages. Some allowing these local distinctions to be compromised or - the link between the nature of the town and its peripheral villages. Some of the town and its peripheral villages. Some allowing these local distinctions to be compromised or - the link between the nature of the town and its peripheral villages.
