AQ-2 *Would the CP proposals when added to those in the JCS lead to any breach in EU air quality targets or to any deterioration in air quality where any breach has already occurred?*

This local plan Examination should not narrow down the Air Quality (AQ) remit too much (i.e. by looking solely at the CLP allocation sites).

The adopted JCS promises local AQ Policies (to cover the whole town, most of which is existing fabric not proposed), but CBC has chosen to venture no such Policies in its CLP.

This evasion is unacceptable, unsound, and needs to be remedied forthwith.
