

ABC FAIRVIEW PLAY AREA IMPROVEMENT PROPOSAL

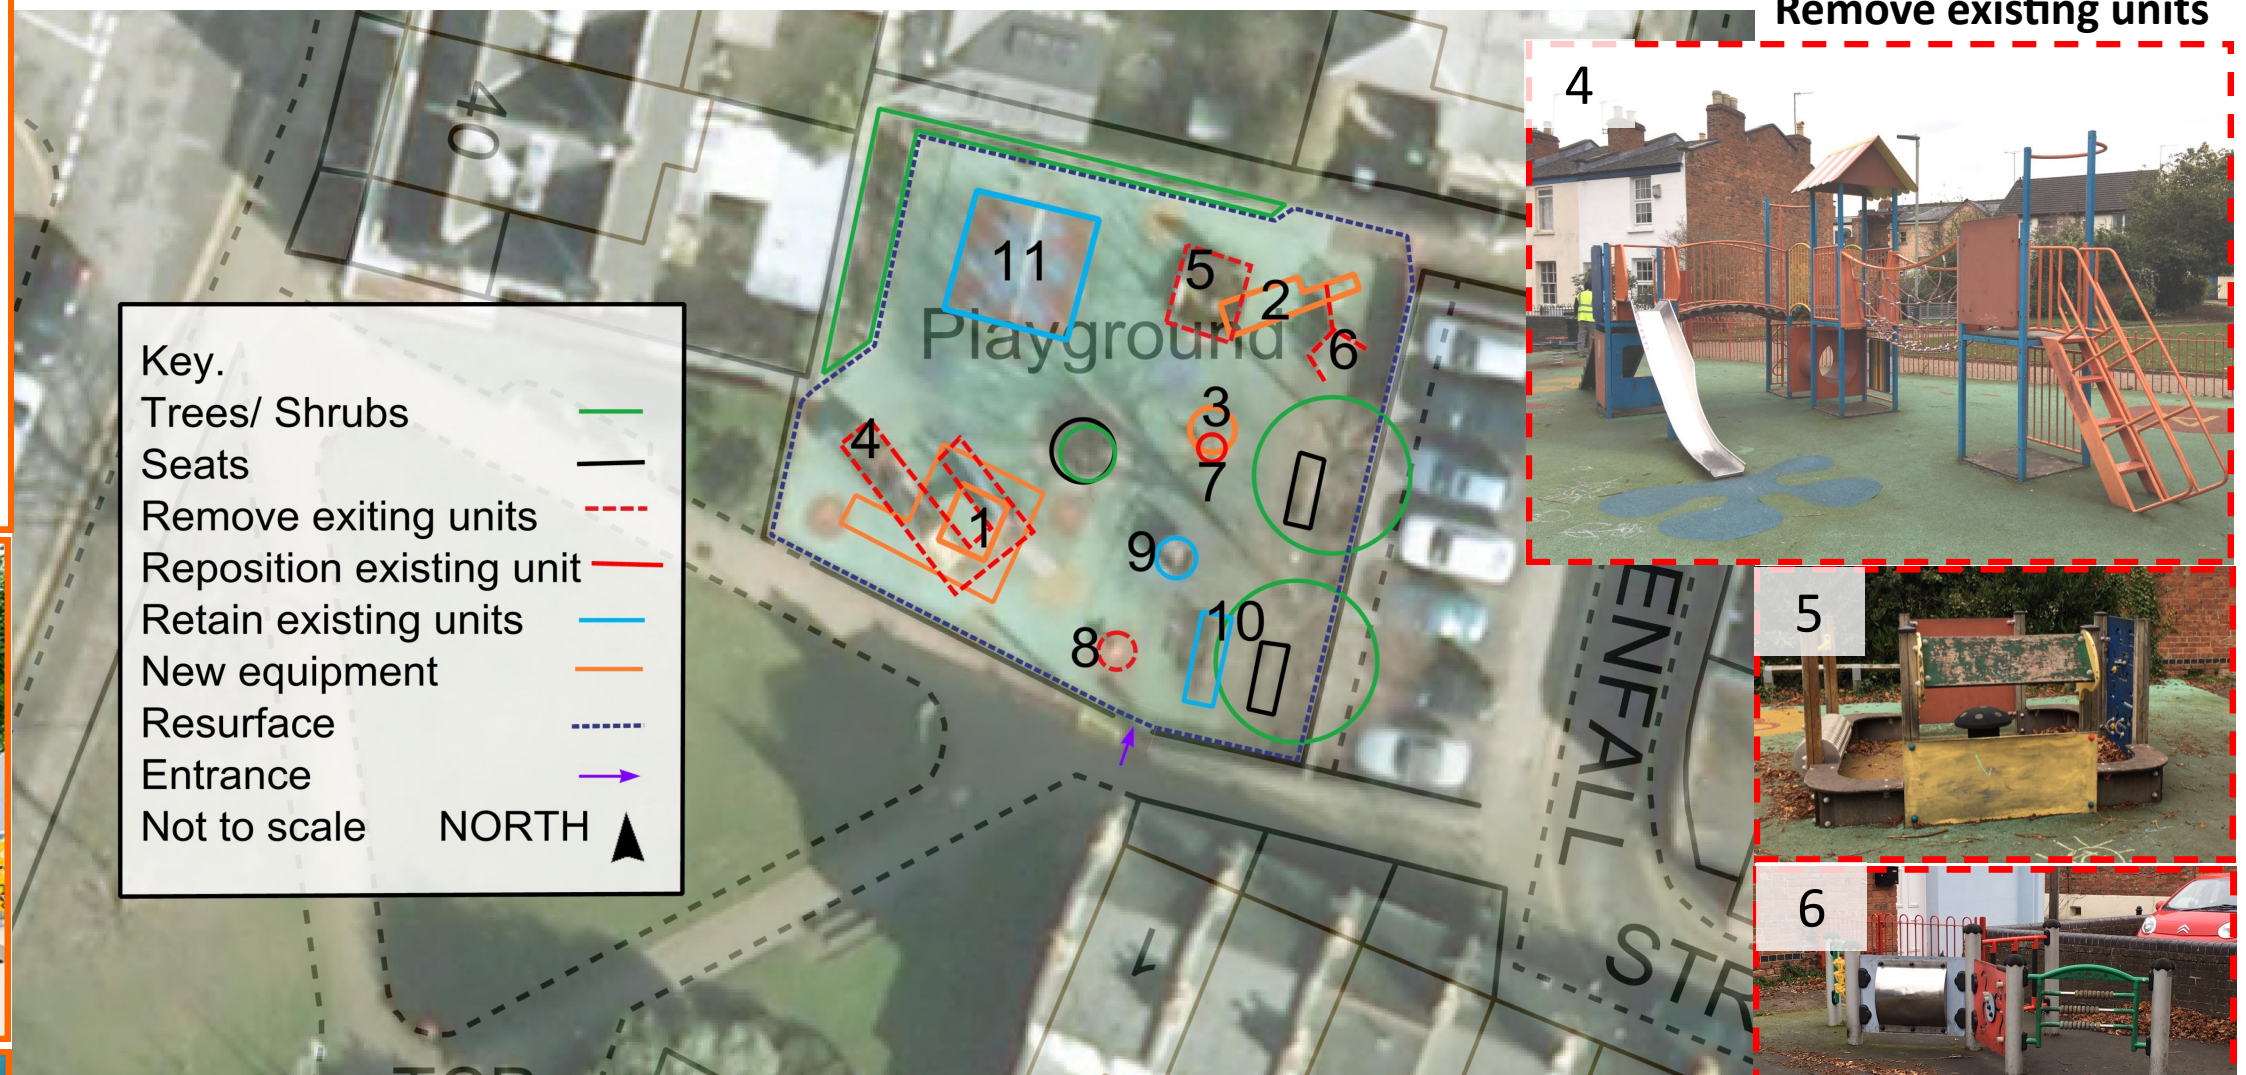

It's time for a revamp. The proposal is to remove tired and unused units 4, 5, 6 and 8, relocate unit 7, refurbish units 9, 10 and 11, and install a new tower unit, themed bus and roundabout. The three new units will provide social interaction, imaginative play, physical activity, educational play and

New equipment

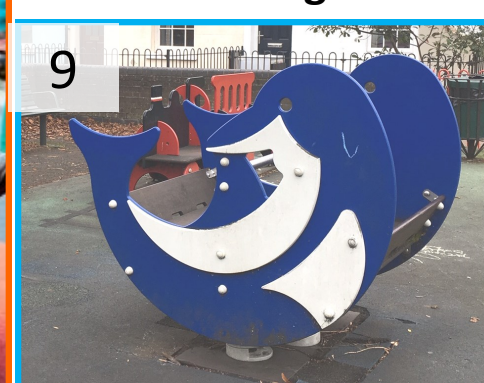

excitement for toddlers and young children. The platform heights don't exceed the current platform heights, making it easy for guardians to follow their children round the large units. New safety surfacing will be laid throughout out the whole of the play area. If you have any comments please
