

THE CHELTENHAM PLAN

Comment ID 59

Representor ID 393

I realised at the hearing this morning (Wednesday 13th February 2019) that, whilst the Inspector's role is to determine whether the plan as submitted, is sound or not, it seems that not one of the representations made during the February/March/April consultation last year has been incorporated into the Plan, including those which point out where the plan fails to comply with the agreed JCS. I would appreciate understanding therefore, what, if any, chance exists of these representations being reflected in the plan if Cheltenham Borough Council has chosen to go through the motions of consultation, only to ignore the output. CBC may believe they have fulfilled a technical requirement, but if they do not respond to the reasons for it, they will have made a mockery of the process and reduced it to a wasteful paper exercise.
