#### **ELECTRICITY AND LIGHTING COMMITTEE.**

1—Gas Examiner's Report—The Gas Examiner reported that he had tested the gas for illuminating power on the 19th inst., with the following result :-15 candles. Tests for purity made on the 16th and 17th inst., showed 26.5 grains of sulphur per 100 cubic feet.

3—Tenders for Coal—Resolved, That tenders be invited by advertisement in " The Colliery Guardian " and the " Gloucestershire Echo " for a 12 months' supply of coal for the Electricity Works.

4—St. George's Road Public Lighting—The Committee further considered the report of the Borough Electrical Engineer for improving the lighting of this road by substituting metallic filament incandescent electric lamps in place of the existing incandescent gas lamps. He submitted an estimate of the cost of electric lamps if new lamp posts were provided, and an alternative estimate if the Light Railway Standards were utilized. The two schemes compared with the present cost of gas lighting as follows :

[continued below]

## ELECTRIC LIGHTING,

	Present Gas Lamps	If New Posts provided	If Light Railway Standards used
Original Outlay	---	£68 8 0	£64 8 0
Annual Cost	£47 2 6	£47 0 6	£41 0 0
Ditto (excluding capital charges)	£47 2 6	£40 4 4	£34 11 0
No. of Lamps ...	18	19	23
Average distance apart	49 yards	46 yards	38 yards.
Total c.p. Nominal	900	950	1150
Do. Actual ...	450 (est.)	900	1100
Cost per actual c.p. per annum (excluding capital charges)	2s 1d	10 ¾ d.	7 ½ d.

He recommended the scheme for utilizing the Light Railway Standards, the annual cost of which would be £41 as against £47 2s. 6d. for gas. The £41 included 10 per cent. interest on the capital outlay. This scheme would provide a nominal c.p. of 1150 against 900 the present nominal c.p. of the gas lamps, but the Electrical Engineer pointed out that while the nominal candle power of the gas lamps is rapidly reduced to about half, the electric lamps maintain their candle power throughout their life within about 5 or 6 per cent. Owing to the increased number of lamps it would be possible to extinguish half of them at 10.30 p.m. or 11 p.m., thus saving a great deal

218

of energy. Automatic switches would be installed which would extinguish and light the lamps, thus reducing labour charges. Resolved, That the scheme submitted for installing 23 electric metal filament lamps on the Light Railway Standards be approved and that application be made to the Board of Trade for their consent to run the overhead wire and that notice be given to the Gas Company to discontinue the gas lamps which will not be required.

5—Extension of Main—The Borough Electrical Engineer reported that he had obtained the consent of Mr. H. Steel to a cable being laid along a private road leading from Hale's Road between gardens belonging to Coltham Field Cottages and Battledown Gates, in order to give a supply of electric energy to Battledown Priors, subject to the Corporation agreeing to remove or alter the position of the cable at any time upon 12 months' notice and also indemnifying him against any damage in consequence of the cable being laid along such road. Resolved, That an agreement be entered into with Mr. Steel accordingly.

6—Lighting of Pilford Road—Read a letter from Mr. H. A. Webb, suggesting that as houses were in course of erection at the further end of Pilford Road, a lamp should be placed at the extreme end of and one about half-way up the road. Resolved, That consideration of the matter be adjourned for the Committee to view.

7—Arc Lamp, Lansdown Road—Resolved, That an arc lamp be fixed on the footway in front of the eastern boundary of Polefield, Lansdown Road, in substitution for the lamp until recently in the centre of the roadway, near the Whish Fountain.

4—Purchase of Corporation Stock—Read a letter from Messrs. Walter Wilkins & Son, offering for sale £300 Cheltenham Corporation Stock. Resolved, That the same be purchased at 82  $\frac{3}{4}$  per cent. out of the Sinking Funds and that the Stock be cancelled.

5—Loans—The Borough Accountant reported that since the last meeting he had received £475, upon loan at 3 5/8 per cent. interest, repayable at the end of 3 years, or at, or at any time after, the end of 5 years upon six months notice. He had also received £1,500 upon loan at 3 ½ per cent. interest, repayable at any time upon 3 months' notice. This latter sum could be applied in part replacement of a loan to be repaid this month and bearing interest at 3 ¾ per cent., the lenders being willing to take a transfer of the security from the former lender subject to the Corporation being also parties. Resolved, That a debenture for £475 be sealed and issued on account of sanctioned loans and the Corporate Seal be also affixed to the transfer of the security for securing the repayment of £1,500.

6—Rating of Midland Railway--Read, a letter from the Rating Surveyor of the Midland Railway Co., stating that they were appealing against the Poor Rate assessment of their property and to avoid also having to appeal against the District Rate, they asked for an undertaking by the Corporation that the accounts would be adjusted in accordance with any reduction made in the assessment as the result of such appeal. Resolved, That the undertaking be given.

7—Accounts—The Financial Statement of the Receipts and Expenditure since the last meeting and the Bills and Accounts to be paid were examined, and the latter ordered to be paid by the Borough Treasurer.

The Treasurer's accounts at the Bank were examined, and the balances found to be correct. The following was the General Statement :—
