

Pupil Product Ratios (PPR) Check

Actual NOR as at Pupil Census January 2021

The Cognisant Study in 2019 surveyed a sample of dwellings at six housing developments.

The actual number of pupils on roll at GCC schools was recorded in the Pupil Census in January 2021 for these developments as shown in the table below.

These developments are not yet mature and the additional demand for school places generated by these developments is expected to increase in future years. This is indicated by the numbers of pupils being generally lower in the older cohorts. The total number of pupils accessing a school place will increase as the larger numbers of children in the younger cohorts age through the phases of education.

Number of pupils	Stroud Hunts Grove	Cotswold Kingshill Meadow	Cotswold Upper Rissington	Tewkes Coopers Edge	Stroud Coopers Edge	Tewkes Deans Farm	Total
